Dear: Vivvo Hiring Team

**RE:** Front-end Developer Position

I am writing to express my interest in the front-end developer position at Vivvo, as advertised in Indeed.com. As student at Saskatchewan Polytechnic enrolled in the Computer System Technology program, I believe I have gained and acquired the sufficient skills and experience to be a great asset to company.

During my training at Saskatchewan Polytechnic, I have acquired a diverse skill set that aligns closely with the requirements outlined within the job description. I have had multiple hands-on experience with a wide variety of programming languages and frameworks and thus I have become proficient in HTML, CSS, JavaScript, Kotlin, Swift, etc. Additionally, my ongoing capstone project involving the development of a website for a client has provided me with invaluable experience in UI/UX design as well as frontend and backend development.

Aside from the technical skills that I have gained throughout my training at Saskatchewan Polytechnic. I've significantly honed my interpersonal and soft skills through various collaborative endeavors. Throughout my academic journey, I've actively engaged in numerous group projects, each presenting unique challenges and opportunities for personal and professional growth. Whether it was dissecting complex problems or brainstorming innovative solutions, I've thrived in environments that demand cooperation and coordination.

I believe that with both my technical and soft skills, I'm more than capable of meeting the requirements to be a proficient front-end developer. I am eager to further discuss how my qualifications and skills can contribute to the success of Vivvo. I am available at your earliest convenience for an interview and can be reached via email at [morales6501@saskpolytech.ca](mailto:morales6501@saskpolytech.ca) or by phone at 306-450-9023.

Thank you for your time and for considering my application.

Sincerely,

*Gabriel Morales*

Full job description

Do you want the experience of working for a small and agile startup but the security of working for an established enterprise? Founded in 2015, we are a fully bootstrapped and profitable startup with established clients. As a frontend developer on our product team you would work at Vivvo headquarters as a part of one of our small teams that is dedicated to building, supporting and delivering our enterprise identity as a service platform.

Do you care as much about how people interact with a website as you do about the content of the site? Vivvo is looking for an experienced front-end developer to help improve the user experience of our flagship product CitizenOne™. The successful applicant will play a key role in helping shape our design, UI and UX strategies as well as building out awesome frontends and reflecting our company values along the way.

At Vivvo, we value Security, Privacy, Ethics and Scalability and products are used every day to facilitate meaningful interactions between citizens and services with these in mind. The best person to join our team would be experienced in the following:

- Significant experience with Javascript/HTML/CSS including Angular, AngularJS and Bootstrap or other similar frameworks
- Tools including Git/Github and Jenkins
- RESTful webservices and a Micro-service architecture
